Scenario principale di successo

1. Il Manager vuole gestire un task associato ad un Sotto-progetto che gestisce
2. Il Manager chiede al Sistema di visualizzare l'elenco dei suoi Sotto-progetti
3. Il Sistema mostra l'elenco dei Sotto-progetti richiesto
4. Il Manager seleziona dall'elenco il sotto-progetto del quale vuole gestire un task
5. Il Sistema mostra le informazioni relative al Sotto-progetto selezionato, compresa la lista dei task ad esso associati
6. Il Manager chiede al sistema di eseguire una operazione

Extension

4.a. Se un Manager cerca di accedere ad un sotto-progetto che contemporaneamente viene riassegnato dall'Azienda ad un altro Manager il sistema restituirà un messaggio di errore e impedirà la gestione dei task al Manager non più assegnatario
6.a. Il Manager chiede al sistema di creare un nuovo Task

1. Il Sistema chiede di inserire un nome e una descrizione relativi al task e di specificare una tariffa ad esso associata
2. Il Manager inserisce un nome, una descrizione ed una tariffa relativi al task
3. if Il Manager inserisce informazioni non conformi alle regole aziendali
3.1. Il Sistema restituisce un errore ed impedisce la creazione del task
3.2. Il Sistema richiede la correzione dei parametri inseriti\[/style]
3.3. Il Manager corregge i parametri errati
3.4. if I parametri sono corretti
3.4.1. Il Sistema permette al Manager di salvare i cambiamenti
3.5. else
3.5.1. jump to \K77hOayGAqAEAxQ1:Zqt1k6yGAqACZTJl\$jhNFJ4KGAqCgAQlc\$uzDIzUKGAqBwAUCn\$AelozUKGAqBwAUax\$y6ozzUKGAqBwAZnF\$KrUzzUKGAqBwAZqe\
end if
end if
4. Il Sistema fornisce un elenco di Consulente
5. Il Sistema chiede di selezionare un task dall'elenco
6. Il Manager seleziona un Consulente dall'elenco fornito dal sistema
7. Il Manager conferma l'operazione
8. Il sistema memorizza il task associandolo al Sotto-progetto selezionato
6.b. Il Manager richiede al sistema di eliminare un task esistente tra quelli associati al sotto-progetto
1. Il Sistema chiede conferma per l'eliminazione
2. Il Manager conferma l'eliminazione
3. Il Sistema elimina il task selezionato
6.c. Il Manager richiede al sistema di modificare un task esistente tra quelli associati al sotto-progetto
1. Il sistema mostra le informazioni relative al task scelto e ne consente la modifica
2. Il Manager modifica le informazioni associate al task (nome e/o descrizione)
3. if Il Manager inserisce informazioni non conformi alle regole aziendali
3.1. Il Sistema restituisce un errore ed impedisce la creazione del task
3.2. Il Sistema richiede la correzione dei parametri inseriti\[/style]
3.3. Il Manager corregge i parametri errati
3.4. if I parametri sono corretti
3.4.1. Il Sistema permette al Manager di salvare i cambiamenti
3.5. else

end if
end if
4. Il Manager conferma l'operazione
5. Il Sistema memorizza i cambiamenti

***a. L'azienda decide di aumentare il budget del sotto-progetto e di conseguenza il Manager decide di aumentare la paga oraria di uno o più task**

1. Il Manager chiede al Sistema di visualizzare l'elenco dei suoi sotto-progetti
2. Il Sistema mostra l'elenco dei sotto-progetti richiesto
3. Il sistema notifica al Manager l'avvenuta modifica di un sotto-progetto da parte dell'Azienda
4. Il Manager seleziona il Sotto-progetto modificato
5. Il sistema mostra i dati relativi al Sotto-progetto selezionato
6. Il Manager verifica le modifiche apportate al sotto-progetto
7. Il Manager richiede un'operazione al sistema

Extension

7.a. Il Manager decide di non apportare ulteriori modifiche ai task associati al Sotto-progetto
7.b. Il Manager gestisce i task associati al sotto-progetto
1. Il Manager richiede eventualmente al sistema la modifica della tariffa
2. Il Sistema memorizza le modifiche apportate

***b. L'azienda decide che ad un task possono lavorare più consulenti**

1. Il Manager vuole gestire un task associato ad un Sotto-progetto che gestisce
2. Il Manager chiede al Sistema di visualizzare l'elenco dei suoi Sotto-progetti
3. Il Sistema mostra l'elenco dei Sotto-progetti richiesto
4. Il Manager seleziona dall'elenco il sotto-progetto del quale vuole gestire un task
5. Il Sistema mostra le informazioni relative al Sotto-progetto selezionato, compresa la lista dei task ad esso associati
6. Il Manager richiede un'operazione al sistema
7.

Extension

6.a. Il Manager chiede al sistema di creare un nuovo Task
1. Il Sistema chiede di inserire un nome e una descrizione relativi al task e di specificare una tariffa ad esso associata
2. Il Manager inserisce un nome, una descrizione ed una tariffa relativi al task
3. loop
3.1. Il Sistema fornisce un elenco di Consulenti da cui selezionare quello da associare al task
3.2. Il Sistema chiede di selezionare un task dall'elenco
3.3. Il Manager seleziona un Consulente dall'elenco fornito dal sistema
3.4. Il Manager conferma l'operazione
until Il Manager non indica che ha terminato
4. Il sistema memorizza il Task associandolo al Sotto-progetto selezionato
6.b. Il Manager richiede al sistema di eliminare un task esistente tra quelli associati al sotto-progetto
1. Il Sistema chiede conferma per l'eliminazione

2. Il Manager conferma l'eliminazione
3. Il Sistema elimina il task selezionato
6.c. Il Manager richiede al sistema di modificare un task esistente tra quelli associati al sotto-progetto
1. Il sistema mostra le informazioni relative al task scelto e ne consente la modifica
2. if Il Manager effettua le modifiche sulle informazioni del task (nome e/o descrizione)
2.1. Il Manager conferma l'operazione
2.2. Il Sistema memorizza i cambiamenti
3. else if Il Manager aggiunge nuovi consulenti al task
3.1. loop
3.1.1. Il Sistema fornisce un elenco di Consulenti da cui selezionare quello da associare al task
3.1.2. Il Sistema chiede di selezionare un task dall'elenco e specificare la paga ad esso associata
3.1.3. Il Manager seleziona un Consulente dall'elenco fornito dal sistema ed inserisce le informazioni richieste relative alla paga del Consulente
3.1.4. Il Manager conferma l'operazione
until Il Manager indica di aver terminato
3.2. Il sistema memorizza le modifiche effettuate
4. else if Il Manager elimina un Consulente associato al task
4.1. Il Sistema chiede conferma per l'eliminazione
4.2. Il Manager conferma l'eliminazione
4.3. Il Sistema rimuove il Consulente dal task
end if

***c. In qualsiasi momento il sistema fallisce.**

1. Il Manager riavvia il sistema e si autentica
2. Il Manager chiede al Sistema di visualizzare l'elenco dei suoi sotto-progetti
3. Il Sistema mostra l'elenco dei sotto-progetti richiesto
4. Il Manager seleziona dall'elenco il Sotto-progetto sul quale stava lavorando prima che il sistema fallisce
5. Il Sistema mostra le informazioni relative al Sotto-progetto selezionato
6. Il Manager verifica lo stato del sotto-progetto
7.

Extension

6.a. I cambiamenti del sotto-progetto non sono stati registrati
1. Il Manager gestisce i task del sotto-progetto
6.b. I cambiamenti del sotto-progetto sono stati registrati correttamente
6.c. I cambiamenti del sotto-progetto non sono stati registrati correttamente
1. Il Manager gestisce i Task del Sotto-progetto

***d. Il Manager si trova a dover sostituire un Consulente associato ad un task causa rinuncia dello stesso o licenziamento**

1. Il Manager vuole sostituire un consulente associato ad un task associato ad un sotto-progetto che gestisce
2. Il Manager chiede al Sistema di visualizzare l'elenco dei suoi Sotto-progetti
3. Il Sistema mostra le informazioni relative al Sotto-progetto selezionato, compresa la lista dei task ad esso associati
4. Il Manager seleziona un task al quale vuole sostituire il Consulente
5. Il Sistema elimina l'attuale Consulente associato al task
6. Il Sistema fornisce un elenco di Consulenti da cui selezionare quello da associare al task
7. Il Sistema chiede di selezionare un task dall'elenco
8. Il Manager seleziona un Consulente dall'elenco fornito dal sistema
9. Il Manager conferma l'operazione
10. Il Sistema memorizza le modifiche apportate al task

Scenario principale di successo

1. Il Consulente seleziona il task di interesse
2. Il Consulente crea un nuovo time-record
3. Il Consulente inserisce i valori riferiti al time-record, ovvero: durata della sessione di lavoro (comprensivo di eventuali pause)/inattività e breve descrizione.
4. Il Consulente salva i cambiamenti
5. Il Sistema registra il time-record e ne calcola le relative ore lavorative o di inattività
6. Il Sistema genera/aggiorna il report

Extension

1.a. Se un Consulente cerca di accedere ad un task che contemporaneamente viene riassegnato dal Manager ad un altro Consulente il sistema restituirà un messaggio di errore e impedirà la modifica del task al Consulente non più assegnatario
3.a. Il Consulente inserisce valori di intervalli temporali non conformi alle regole aziendali

1. Il sistema restituisce un errore ed impedisce l'inserimento del time-record
2. Il Consulente modifica tali valori
3. if i valori sono corretti
3.1. il sistema procede al loro inserimento
4. else
4.1. jump to 1. Il sistema restituisce un errore ed impedisce l'inserimento del time-record
end if

*a. In qualsiasi momento il sistema fallisce

1. Il Consulente riavvia il sistema e si autentica
2. Il Consulente seleziona il task d'interesse
3. Il Consulente richiede la visualizzazione del report e verifica l'inserimento del time-record

Extension

3.a. Il time-record non è presente nel report
1. Il Consulente inserisce un nuovo time-record
3.b. Il time-record è stato inserito correttamente nel report
3.c. Il time-record è stato inserito ma non correttamente nel report
1. Il Consulente richiede, al Manager che gestisce il task relativo al time record in questione, la modifica dello stesso

Textual Analysis

Analisi testuale

L'applicazione da realizzare rientra nella categoria di applicazioni cosiddette "time tracking software": ovvero una tipologia di software che permette agli utenti di registrare il tempo che essi spendono su un determinato compito. Possiamo paragonarlo ad una versione elettronica del cartellino.

In generale l'applicazione deve permettere ad un'azienda di poter visionare e gestire alcune caratteristiche di un progetto, in particolare: budget da assegnare all'intero progetto, data di inizio e fine progetto, paga oraria per i consulenti che lavoreranno al progetto. La durata del progetto può essere solo estesa (ad esempio se non si rispettano le scadenze): l'applicazione non deve fare nulla se non evidenziare sempre i tempi prefissati per i sotto-progetti. Compito della Proprietà e quello di dividere un progetto in sotto-progetti ai quali sarà assegnato un unico manager e un budget derivato dal totale. Una volta assegnato un sotto-progetto a un manager quest'assegnazione resta definitiva e non più possibile modificarla come non è modificabile anche la struttura generale del progetto. Ogni manager, una volta a capo di un progetto, ha il compito di dividere il sotto-progetto in task e assegnargli dei consulenti. Un task può essere assegnato ad un solo consulente, ma in generale a quest'ultimo possono venire assegnati più task. Il manager inoltre può cambiare l'assegnazione di un task ad un altro consulente e gestire la tariffa oraria per ogni sotto-progetto. L'applicazione deve permettere al consulente di avere una vista dei soli task ai quali è stato assegnato e inserire "time record", cioè intervalli di tempo lavorativo dedicati ad attività specifiche nell'ambito di progetti oppure intervalli di inattività (pausa pranzo, ferie, festività, ...). A partire dai time record, il sistema deve essere in grado di generare automaticamente dei report ovvero un elenco che oltre all'indicazione temporale contiene anche una descrizione delle attività svolte, inserite dai consulenti. I report possono essere visualizzati per progetto e per Consulente. La visibilità si modella sulla struttura gerarchica dell'azienda:

- La Proprietà può visualizzare il report di ogni progetto e di ogni Consulente;
- Ogni Manager può visualizzare i report dei sotto-progetti di cui è responsabile;
- Ogni Consulente può visualizzare i report relativi alle proprie attività

La Proprietà ha invece, una visione a 360° del progetto, ovvero può vedere tutti i task di tutti i sotto-progetti, in modo tale da servirsi dei dati acquisiti per due motivi: in primo luogo per il pagamento dello stipendio dei consulenti e poi per la fattura da presentare al cliente una volta ultimato il progetto. L'applicazione deve permettere la definizione di regole per il calcolo dello stipendio, il cui totale viene così derivato: una quota fissa che deriva dal livello salariale del consulente (ad esempio un lavoratore junior guadagnerà un fisso minore rispetto ad un senior), una quota variabile che dipende dalle ore di lavoro e dalla paga oraria ed infine eventuali bonus o premi di produzione. La paga oraria è variabile e, tale cambiamento, può essere deciso dal manager che controlla il sotto-progetto. Lo Stipendio, che è calcolato mensilmente, può essere visualizzato in ogni momento dal Manager e dalla Proprietà. Naturalmente in una data generica (non alla fine del mese) sarà considerato solo lo stipendio parziale. Supponendo, inoltre, che un consulente possa essere assunto a metà del mese, nel suo stipendio comparirà una proporzione della paga base. Per quanto riguarda la fattura, questa deve contenere un resoconto dei costi dovuti al lavoro dei consulenti relativamente ad un singolo progetto. Al momento dell'inserimento del progetto, la Proprietà, stabilisce anche delle scadenze periodiche in cui emettere le fatture parziali. La data di emissione della fattura è indipendente dalle date di scadenza sia dei sotto-progetti che dei task. L'applicazione deve permettere inoltre, di mantenere lo storico dei progetti che possono essere cancellati solo se non hanno time record associati.

Textual Analysis

Visione

Introduzione

L'applicazione da realizzare rientra nella categoria di applicazioni cosiddette time tracking software, ovvero una tipologia di software che permette agli utenti di registrare il tempo che essi spendono su un determinato compito. I time tracking software rappresentano quindi la versione elettronica dei cosiddetti paper timesheet. Possiamo quindi pensare ad un software destinato alle aziende focalizzato sulla gestione di progetti e del lavoro svolto dal personale su tali progetti. L'applicazione è quindi flessibile, al fine di supportare le diverse regole di business richieste dal committente ed usufruisce di terminali multipli e meccanismi di interfaccia utente diversificati a seconda dell'utente.

Posizionamento

.....

Opportunità di business

La maggior parte di time tracking software in circolazione rientrano nella tipologia a pagamento. Il nostro software, invece, intende inserirsi all'interno del mercato Open Source ponendosi come obiettivo quello di ottimizzare le funzionalità principali di tali software ed eliminarne alcune problematiche o difetti presenti. In particolar modo i software esistenti non consentono un'elevata flessibilità a supporto della variabilità delle regole di business. Non risultano sufficientemente robusti nello scongiurare errori legati all'inserimento e gestione di dati temporali. Non presentano architetture distribuite a supporto della organizzazione della realtà di interesse. Non implementano politiche di sicurezza efficaci a protezione del sistema.

Formulazione del problema

La quasi totalità dei time tracking software sono a pagamento e quindi difficilmente accessibili da tutte quelle aziende di piccole dimensioni che non intendono/possono spendere cifre considerevoli su tale tipologia di software. Sul fronte opposto la componente OpenSource è corredata spesso da software incompleti in termini di funzionalità e con interfacce utente il cui utilizzo risulta particolarmente ostico agli utenti coinvolti. Questo comporta in definitiva un dilungarsi dei tempi di utilizzo che, al contrario, dovrebbero essere ridotti grazie all'utilizzo del software stesso.

Formulazione della posizione del prodotto

I destinatari del nostro sistema software saranno tutte quelle aziende che intendono ottimizzare i loro profitti automatizzando la gestione della loro attività, in particolare tutte quelle a cui interessa l'automatizzazione della fatturazione e del calcolo di stipendi sulla base del tempo impiegato per lo svolgimento del lavoro. Caratteristiche principali del software e ciò che lo differenzia dalla concorrenza riguardano l'estrema flessibilità a supporto della variabilità delle regole di business e l'elevata efficienza dello stesso.

Alternative e concorrenza

Attualmente sul mercato sono presenti due tipologie di time tracking software:

1. Time tracking/recording software: registrano automaticamente le attività effettuate su un computer
2. Timesheet software: permettono di memorizzare il tempo impiegato per eseguire diverse attività lavorative

In particolare un Time tracking/recording software automatizza processo di monitoraggio del tempo registrando quali attività, quando e per quanto tempo esse vengono eseguite su un computer. Utilizzato all'interno di un'impresa questo software permette di monitorare la produttività dei dipendenti; usato da liberi professionisti consente di creare report per i clienti (come fatture) o di rendicontare l'effettivo tempo di lavoro. Si riportano di seguito le diverse tipologie di time tracking software e le relative caratteristiche:

- Standalone : utilizzati esclusivamente per registrare timesheet (un foglio di tempo o scheda attività) e generare report
- Integrati nel sistema di contabilità : utilizzati per l'immissione dei dati contenuti nei timesheet direttamente all'interno della contabilità aziendale
- Integrati nel sistema di fatturazione : utilizzati per generare le fatture (particolarmente utilizzato da imprenditori e professionisti)

- Integrati nei sistemi di gestione del progetto : utilizzati nel software di project management per rappresentare graficamente gli sforzi spesi per ogni progetto o attività utilizzando i dati presenti nei timesheet.
- Integrati nel sistema retributivo : utilizzati in software gestionali volti al calcolo del salario dei dipendenti sulla base del loro tempo di lavoro, il tutto avvalendosi dei timesheet.

Un Timesheet Software è un software di contabilità utilizzato per registrare timesheet. Questa tipologia di software di monitoraggio ha trovato largo impiego con l'introduzione dei computer all'interno degli uffici. L'idea è stata quella di sostituire tutti i documenti cartacei ed ottenere un'organizzazione migliore delle attività. Il software permette di creare Timesheet il cui fine è monitorare le diverse attività compiute durante una sessione di lavoro. In generale abbiamo anticipato in precedenza dell'esistenza sul mercato di molteplici time tracking software. Un elenco parziale può essere visualizzato nel seguente indirizzo:

http://en.wikipedia.org/wiki/Comparison_of_time_tracking_software

Descrizione delle parti interessate

Le parti interessate nel nostro studio sono le seguenti:

Non utenti:

Il Cliente commissiona ad un'azienda un lavoro.

Utenti:

L'Azienda, incaricata di svolgere un lavoro, avvia un progetto. La gestione di tale progetto avviene suddividendolo in sotto-progetti, ognuno dei quali assegnato ad un Manager.

Il Manager a sua volta suddivide il progetto in task ognuno dei quali è assegnato ad un Consulente.

Il Consulente inserisce i time record relativi al lavoro svolto in relazione al task a lui assegnato.

Obiettivi e problemi fondamentali ad alto livello delle parti interessate:

Un workshop sui requisiti di un giorno con esperti del settore e altre parti interessate hanno portato all'identificazione dei seguenti obiettivi e problemi fondamentali.

Obiettivo ad alto livello Priorità Problemi Soluzioni attuali
 Gestione integrata di progetti e Alta Scarsa flessibilità a Time tracking software/
 relativa fatturazione sulla base del supporto delle regole Timesheet Software.
 tempo impiegato per il lavoro. di business.
 Problematiche connesse
 alla gestione di dati temporali.
 Riduzione dei tempi di utilizzo.
 Mancanza di robustezza.

Obiettivi a livello dell'utente

Gli attori che sono stati individuati sono i seguenti:

- Attori primari: Azienda, Manager, Consulente
- Attori fuori scena: Cliente
- Attori di supporto: al momento non presenti

Ambiente utente

L'ambiente in cui il software dovrà essere eseguito sarà, principalmente, un ufficio all'interno del quale sono presenti una serie di calcolatori sui quali è installato il software che monitorerà il tempo di lavoro di ogni consulente.

Descrizione generale del prodotto

.....

Punto di vista del prodotto

Il software Time Logging sarà installato su calcolatori presenti in uffici, in caso di utilizzo di terminali mobili essi saranno comunque collegati alla rete aziendale tramite connessione remota. In generale il software fornirà servizi agli utenti ma non collaborerà con altri sistemi.

Ipotesi e dipendenze

.....

Costo e determinazione del prezzo.

Software gratuito (Open Source).

License e installazione

Open Source.

Riepilogo delle caratteristiche del sistema

- Gestione dei dati di un progetto
 - o Divisione di un progetto in sotto-progetti
 - o Salvataggio dello storico dei progetti passati
 - o Assegnazione di un sotto-progetto ad un solo manager
- Gestione time record
- Gestione dei dati di un sotto-progetto
 - o Divisione di un sotto-progetto in task
 - o Assegnazione di un task ad un solo consulente
 - o Modifica dell'assegnazione di un task ad un altro consulente
- Generazione di report partendo dai time record
 - o Visualizzazione dei report
- Calcolo dello stipendio dei consulenti
 - o Visualizzazione stipendio dei consulenti
- Calcolo della fattura del progetto

Altri requisiti e vincoli

Per i vincoli di progettazione, usabilità, affidabilità, prestazioni, sostenibilità, vincoli di progettazione, documentazione, packaging e così via: vedere le specifiche Supplementari e i Casi d'uso.

Create Date Time	23-ott-2013 11.52.29
Last Modified	11-dic-2013 11.30.18
ID	6
Stereotypes	requirement

Attributes

Name	Value
Text	cambiare l'assegnazione di un task ad un altro consulente
ID	6
kind	Functional
verifyMethod	Analysis
risk	High
status	Approved

Calcolare stipendio

Name	Value
Documentation	calcolare lo stipendio dei consulenti
Author	Luca
Create Date Time	23-ott-2013 11.56.27
Last Modified	10-dic-2013 16.28.24
ID	REQ-11
Stereotypes	requirement

Attributes

Name	Value
Text	calcolare lo stipendio dei consulenti
ID	REQ-11
kind	Functional
verifyMethod	Analysis
risk	Medium
status	Approved

Salvare storico progetti

Name	Value
Documentation	salvare lo storico dei progetti passati
Author	Luca
Create Date Time	23-ott-2013 11.58.08
Last Modified	10-dic-2013 16.28.24
ID	REQ-14
Stereotypes	requirement

Attributes

Name	Value
Text	salvare lo storico dei progetti passati
ID	REQ-14

kind	Functional
verifyMethod	Analysis
risk	Low
status	Approved

Login

Name	Value
Documentation	identificazione ed autenticazione degli utenti.

Stereotypes	requirement

Attributes

Name	Value
Text	identificazione ed autenticazione degli utenti.
ID	17
kind	Functional
verifyMethod	Analysis
risk	Low
status	Approved

Gestire dati sotto-progetto

Name	Value
Documentation	gestire i dati di un sotto-progetto
Author	Luca
Create Date Time	23-ott-2013 11.53.19
Last Modified	10-dic-2013 16.28.24
ID	REQ-7
Stereotypes	requirement

Attributes

Name	Value
Text	gestire i dati di un sotto-progetto
ID	REQ-7
kind	Functional
verifyMethod	Analysis
risk	Medium
status	Approved

Inserire time record

Name	Value
Documentation	inserire di time record
Author	Luca
Create Date Time	23-ott-2013 11.53.57
Last Modified	10-dic-2013 16.28.24
ID	REQ-8
Stereotypes	requirement

Attributes

Name	Value
Text	inserire di time record
ID	REQ-8
kind	Functional
verifyMethod	Analysis
risk	Low
status	Approved

Generare report

Name	Value
Documentation	generare report partendo dai time record
Author	Luca
Create Date Time	23-ott-2013 11.54.26
Last Modified	10-dic-2013 16.28.24
ID	REQ-9
Stereotypes	requirement

Attributes

Name	Value
Text	generare report partendo dai time record
ID	REQ-9
kind	Functional
verifyMethod	Analysis
risk	Low
status	Approved

Calcolare fattura

Name	Value
Documentation	calcolare la fattura del progetto
Author	Luca

Create Date Time	23-ott-2013 11.57.00
Last Modified	10-dic-2013 16.28.24
ID	REQ-12
Stereotypes	requirement

Attributes

Name	Value
Text	calcolare la fattura del progetto
ID	REQ-12
kind	Functional
verifyMethod	Analysis
risk	Medium
status	Approved

Definire regole calcolo fattura

Name	Value
Documentation	definire regole per il calcolo della fattura
Author	Luca
Create Date Time	23-ott-2013 11.58.59
Last Modified	10-dic-2013 16.28.24
